

Glacē™

The Ultimate Glass Skin Solution

A versatile and comprehensive skin clarifying
treatment designed to cleanse, smooth,
and illuminate with glass-like perfection

 **CANDELA®**
Science. Results. Trust.

Glass-Like Radiance, Powered by Innovation

Harnesses cutting-edge technology and advanced science to deliver luminous skin

Glacē™ (pronounced / 'GLASS-y / GLASS-ie / GLASS-ee) is a revolutionary skin purifying treatment inspired by the South Korean beauty philosophy of 'glass skin'—the flawless, light-reflecting radiance of healthy, hydrated skin. Combining advanced hydrodermabrasion, dual-mode cupping massage, and LED technology, Glacē cleanses, smooths, and illuminates for glass-like perfection.

This innovative, integrated technology treatment delivers customizable treatments tailored to each individual, with results that reveal naturally luminous, smooth, and visibly refined skin^{1,a}. By combining cutting-edge science and indulgent care, Glacē elevates the art of skincare, delivering clarity, hydration, and beauty that inspires confidence.

Three advanced technologies for one comprehensive treatment

Hydrodermabrasion: Gently cleanses, exfoliates and replenishes skin with precision-engineered diamond tips and GlacēVac™ adjustable closed-vacuum technology, leaving skin clean and hydrated

- Smooths skin texture and boosts hydration with hygienic, precise treatments
- Two-phase serum infusion treatment redefines skincare, offering a fully tailored solution for diverse skin needs

Dual-Mode Cupping: Delivers a relaxing cupping massage that detoxifies and contours two areas simultaneously for reduced treatment time¹

- Two modes: Pulsed mode supports lymphatic drainage to reduce the appearance of puffiness and support the skin's natural detoxification, while continuous mode temporarily enhances contours for a sculpted look
- Synchronized, uniform application improves treatment efficiency and results^{1,a}

LED Treatment: Pairs GlacēFinish LED technology with a soothing biocellulose mesh mask to illuminate and revitalize skin

- Application of red, green, or blue lights calm irritation, and boost radiance
- Ultra-moisturizing biocellulose mesh mask adapts seamlessly to facial contours to soothe skin and promote a post-treatment glow

The Glacē Difference

Efficient, comfortable treatments that reveal skin's glow

Patients today seek more than visible improvements; they desire a luxurious experience that enhances their natural beauty. Glacē pairs advanced technology with versatile serums to deliver highly-personalized treatments for various skin types.

- **Advanced Hydrodermabrasion:** Cleanses, exfoliates, extracts and replenishes skin^{1,2} for glass-like clarity
- **Diamond Tips:** Precision-engineered, single-use diamond tips elevate hygiene standards and ensure gentle exfoliation tailored for various skin types²
- **Quiet Operation:** Ensures a tranquil and relaxing treatment environment¹
- **Generous Serums:** Targeted formulas provide full coverage for maximum results^{1,a}
- **Dual-Mode Cupping GlacēMassage:** Synchronized, uniform application reduces treatment time while promoting detoxification and enhancing symmetry^{1,2}
- **Seamless Integration:** Complements a full menu of pre-and post-care professional services^{a,**}
- **Flexible Settings:** Adjustable GlacēVac closed vacuum technology, serum flow rates, and diamond exfoliation tips cater to a broad range of skin types and conditions²

The Art of Glass Skin

Tailored treatments for personalized care

Glacē's two-phase serum treatments work seamlessly with its advanced hydrodermabrasion. This approach infuses active ingredients into the skin, delivering hydration and targeting individual patient needs. Every treatment is tailored for visible, glowing results^{1,a}.

Phase A: Cleanse, exfoliate, and extract to lay the foundation

Balanced Flight

Gently cleanses and decongests oily skin for a refreshed, radiant glow

Vitality Blossom

Enriched with vitamins to nourish, hydrate, and energize dull, fatigued skin

Phase B: Infuse, restore, and nourish to target unique skin concerns

Light Emerge

Packed with antioxidants formulated to even the appearance of skin tone, reduce blemishes, and brighten

Silky Touch

Provides hydrating and restorative agents to soothe and protect reactive skin

Total Evolve

Hydration intensifier designed to firm, energize, and boost suppleness of aging skin

Mineral Nurture

Replenishes tired and dull skin for a glowing, radiant complexion

A + B = Glass-like Skin

Cleanse, exfoliate, and extract to lay the foundation

	Oily Skin**	Dull, Malnourished Skin**
	Balanced Flight	Vitality Blossom

Infuse, restore, and nourish to target unique skin concerns

	Blemishes & Uneven Skin Tone**	Sensitive, Reactive Skin**	Dull, Tired Skin**	Dry, Aged Skin**
	Light Emerge	Silky Touch	Mineral Nurture	Total Evolve

With your choice of four, precision-engineered diamond tips (Fine [30 µm], Medium [45 µm], Coarse [60 µm], or Blunt [0 µm] levels of abrasion), adjustable suction, and precise infusion rates, Glacē delivers optimal serum penetration for visible results.^{1,2,a}

**Denotes evaluated baseline skin condition and appearance only

Luminous Results, Powered by Glacē

Transformative beauty you can see^{1,a}

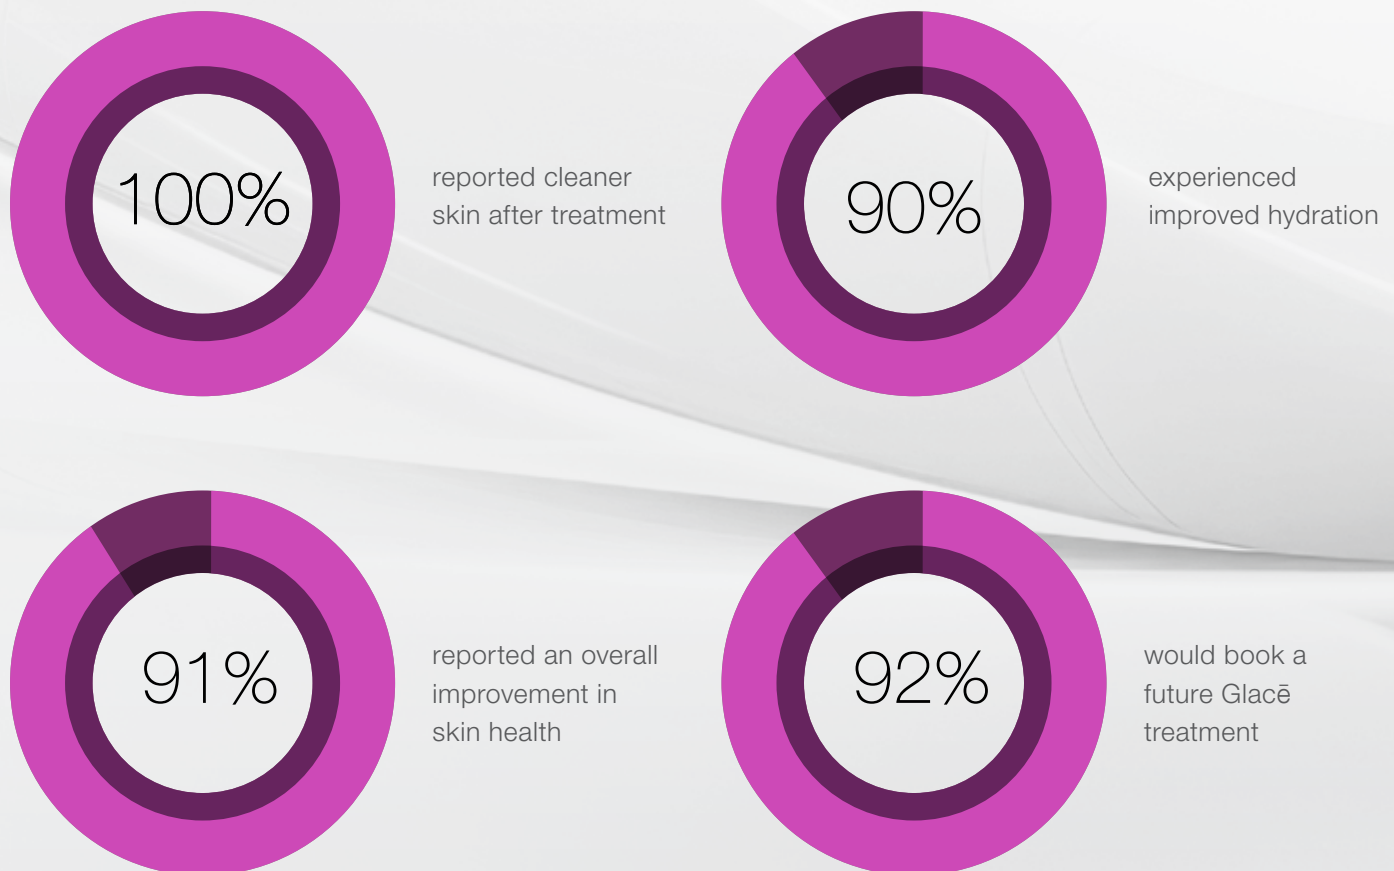

Reveal the Difference. Glacē delivers visible transformations that go beyond expectations.

From smoother texture to luminous hydration, Glacē provides radiant, glass-like skin with every session.^{1,a}

Why Glacē Stands Out^{1,a}

- **Tailored Treatments:** Adjustable settings, selection of precision-engineered diamond tips available in four levels of abrasion, and targeted serums for precise care
- **Gentle Yet Effective:** Perfect for sensitive areas, Glacē delivers improvements without harsh abrasives
- **Treatment Versatility:** Treats skin on the face, neck, décolletage, and more, expanding your clinic's offerings and ensuring tailored care
- **Efficient Workflow:** Hydrodermabrasion with dual-operating modes streamline treatment times for faster patient throughput
- **Customizable LED Treatment:** Paired with a soothing biocellulose mesh mask, red, green, or blue lights calm irritation, promote protection of the skin barrier, and boost radiance

What patients are saying^{1,a}
